

Please amend the claims as follows:

1. (Canceled)
2. (Previously Presented) The computer-readable storage medium according to claim 15, wherein the monetary value is determined by a multiplication of the potential monetary impact by the corresponding one of frequency and probability.
3. (Previously Presented) The computer-readable storage medium according to claim 15, wherein the set of instructions performs the step of:
reporting each of the risks and opportunities to management of the business entity.
4. (Previously Presented) The computer-readable storage medium according to claim 15, wherein the set of instructions performs the steps of:
handling at least one of the risks to decrease the probability that the at least one risk will occur; and
handling at least one of the opportunities to increase the probability that the at least one opportunity will occur.
5. (Previously Presented) The computer-readable storage medium according to claim 15, wherein one of a checklist and a questionnaire identifies one of the risks and the opportunities.
6. (Previously Presented) The computer-readable storage medium according to claim 15, wherein the set of instructions performs the step of:
identifying a root cause for one of the risks and the opportunities.
7. (Previously Presented) The computer-readable storage medium according to claim 15,

wherein the predetermined times include one of a month and a week.

8. (Previously Presented) The computer-readable storage medium according to claim 2, wherein the set of instructions performs the step of:

ranking each risk based on a result of the multiplication of the potential monetary impact of each risk by the corresponding one of frequency and probability for the risk.

9. (Previously Presented) The computer-readable storage medium according to claim 15, wherein the set of instructions performs the step of:

comparing a previously projected future condition to an actual condition at a time corresponding to the previously projected future condition to determine an accuracy of the projected future condition.

10. (Currently Amended) A system, comprising:

a first storage means for receiving and storing data corresponding to a plurality of risks and a plurality of opportunities for the business entity;

a second storage means for receiving and storing data corresponding to a potential monetary impact on the future condition of the business entity of each of the risks and opportunities stored in the first ~~data-storage module~~ means;

a first input means for receiving, for each opportunity stored in the first storage means, data corresponding to one of a probability that the opportunity will occur during a predetermined period of time and a frequency at which the opportunity will occur;

a second input means for receiving, for each risk stored in the first storage means, data corresponding to one of a probability that the risk will occur during a predetermined period of time and a frequency at which the risk will occur; and

a calculation means for projecting the future condition of the business entity based on a monetary value of each of the risks and opportunities stored in the first storage means, wherein the monetary value is a function of the potential monetary impact and the one of frequency and probability for each of the risks and opportunities from the first and second input means.

11. (Previously Presented) The system according to claim 10, wherein the calculation means projects the monetary value for the future condition of the business entity based on a multiplication of the potential monetary impact of each of the risks and opportunities stored in the first storage means by the corresponding one of frequency and probability.
12. (Previously Presented) The system according to claim 11, wherein risks having monetary values below a threshold are accepted.
13. (Previously Presented) The software system according to claim 10, further comprising:
a handling means for including risk handling measures to decrease the probability that at least one risk will occur.
14. (Previously Presented) The system according to claim 10, further comprising:
an assessment means for determining if at least two risks affect one future condition.
15. (Previously Presented) A computer-readable storage medium storing a set of instructions, the set of instructions capable of being executed by a processor to project a future condition of a business entity, the set of instructions performing the steps of:

identifying a plurality of risks and a plurality of opportunities for the business entity;

evaluating at predetermined times a potential monetary impact of each of the risks and each of the opportunities on the future condition of the business entity;

determining at each of the predetermined times for each of the risks, one of a probability that the risk will occur during a predetermined period of time and a frequency at which the risk will occur;

determining at each of the predetermined times for each of the opportunities, one of a probability that the opportunity will occur during a predetermined period of time and a frequency at which the opportunity will occur;

projecting at each of the predetermined times the future condition of the business entity based on a monetary value of each of the risks and opportunities, wherein the monetary value for each of the risks and opportunities is determined based on the potential monetary impact and the corresponding one of frequency and probability.

16. (Previously Presented) The computer-readable storage medium according to claim 15, wherein the potential monetary impact is a function of one of earnings before interest and taxes ("EBIT"), operating cost savings and market share gains.
17. (Currently Amended) A computer-readable storage medium storing a set of instructions, the set of instructions capable of being executed by a processor to project a future condition of a business entity, the set of instructions performing the steps of computer implemented method of projecting a future condition of a business entity facing a plurality of risks and a plurality of opportunities, comprising the steps of:

evaluating at predetermined times a potential monetary impact of each of the risks and each of the opportunities on the future condition of the business entity;

determining at each of the predetermined times for each of the risks one of a probability that the risk will occur during a predetermined period of time and a frequency at which the risk will occur;

determining at each of the predetermined times for each of the opportunities one of a probability that the opportunity will occur during a predetermined period of time and a frequency at which the opportunity will occur; and

projecting at each of the predetermined times the future condition of the business entity based on a monetary value of each of the risks and opportunities, wherein the monetary value for each of the risks and opportunities is determined based on the potential monetary impact and the corresponding one of frequency and probability.

18. (Currently Amended) The method computer-readable storage medium according to claim 17, wherein the monetary value is determined by a multiplication of the potential monetary impact by the corresponding one of frequency and probability.
19. (Currently Amended) The method computer-readable storage medium according to claim 17, ~~further comprising wherein the set of instructions performs~~ the step of:
providing measures to decrease the probability that at least one risk will occur.
20. (Currently Amended) The method computer-readable storage medium according to claim 17, ~~further comprising wherein the set of instructions performs~~ the step of:
providing measures to increase the probability that at least one opportunity will occur.
